

Expertise Across GxPs

From routine audits to inspection readiness to Quality Management System development, our expertise spans all GxPs including: GCP, GLP, GcLP, GMP, GVP, GMP and GDP.

FDAQRC employs a staff of dedicated home-based Project Managers and Auditors and has a global network of more than 200 consultants. Our team has expertise in all areas and includes QA credentialed and former FDA professionals. We provide custom value-added solutions, processes, and enhanced quality standards to optimize business efficiencies and minimize regulatory risk.

Since 2009, FDAQRC has worked to establish long-standing professional relationships with both clients and consultants worldwide. FDAQRC understands the client needs and strives to match them with the most highly knowledgeable and trained consultant to assure each deliverable meets our high expectations.

The Right Solution

At FDAQRC, we ensure your projects are secure with FDAQRCync – our customized information portal.

With a plan in place, we ensure our clients get the right consultant by choosing resources based on experience, location, and quality. In addition, an FDAQRC Project Manager will be assigned to the project. This PM is home based, non-traveling, and will be your primary point of contact during the course of our engagement. The PM will create and execute a collaboration plan specific to your project, ensuring a successful outcome. Our Project Managers use FDAQRCync as a quick, seamless, and secure way to exchange project materials with clients.
